

Social Media Crossposter (SMC)

Analytics & Advertising Integration Overview

Document version: 2.0

Date: July 2026

Audience: Clients, marketing teams, and business stakeholders

Product: Social Media Crossposter (SMC)

1. Overview

Social Media Crossposter (SMC) is an all-in-one marketing dashboard. Publish content across social channels and **view performance in one place** — without switching between Google, LinkedIn, and Meta dashboards.

Why SMC for analytics?

Benefit	What it means for you
Single panel	Ads and post performance in one branded dashboard
Secure connection	Official platform login (OAuth) — SMC never stores your passwords
Read-only reporting	View metrics safely; campaign changes stay in Google/LinkedIn Ads Manager
Date flexibility	Last 7, 30, or 90 days — or pick a custom range
Self-hosted option	Your data stays on your infrastructure (enterprise deployments)

What SMC is — and is not

SMC is	SMC is not
A unified view of ads and content performance	A replacement for Google Ads Editor or LinkedIn Campaign Manager
A cross-posting + reporting hub	A tool that changes bids, budgets, or ad creative
Built for marketers who want clarity	A third-party analytics SaaS with extra fees per seat

2. Platform Coverage at a Glance

Platform	Content publishing	Organic analytics	Paid ads analytics
Google Ads	—	—	✅ Available
LinkedIn Ads	—	—	✅ Available
LinkedIn (profile posts)	✅ Available	⚠️ Available after platform approval	
Facebook	✅ Available	➡️ SOON Coming soon	➡️ SOON Planned
Instagram	✅ Available	➡️ SOON Coming soon	➡️ SOON Planned

Analytics features are included on **Medium** and **Premium** plans.

3. Your SMC Dashboard — What You See

When you log in, the **Dashboard** gives you a quick picture of marketing activity:

Main dashboard panels

Panel	Insights
LinkedIn performance	How your published posts are performing — reach, reactions, comments
Google Ads performance	Campaign health at a glance — clicks, spend, trends
LinkedIn Ads performance	Same clarity for LinkedIn advertising
Upcoming scheduled posts	What goes live next
Recently published	Latest cross-posted content

Dedicated analytics pages

Page in SMC	Best for
Google Ads	Deep dive into Google campaigns, costs, and conversions
LinkedIn Ads	LinkedIn campaign performance and spend
Posts	Per-post stats for content published through SMC

4. Google Ads in SMC

What you get

Connect your **Google Ads account** and see:

Metric	Description
Impressions	How often your ads were shown
Clicks	Visits driven by your ads
Cost	Total ad spend for the selected period
Conversions	Actions completed on your site (when tracked)
CTR	Click-through rate — ad relevance indicator

Views available:

- Account summary for your chosen date range
- Daily trend charts (clicks, cost)
- Campaign breakdown table — compare campaigns side by side

How to connect (3 steps)

1. Open **Google Ads** in the SMC sidebar
2. Click **Connect Google Ads** and sign in with your Google account
3. Click **Sync now** to refresh the latest data

What you can control from SMC

Action	Supported
Connect / disconnect your Google Ads account	✓ Yes
View metrics and charts	✓ Yes
Refresh data (Sync)	✓ Yes
Create or edit campaigns	✗ No — use Google Ads
Change budgets or bids	✗ No

Note: Google requires an approved developer connection for live ad accounts. Your administrator completes a one-time platform setup; after that, you simply connect and sync.

5. LinkedIn in SMC

LinkedIn is supported in **two ways** — organic content and paid ads.

5A. LinkedIn posts (organic content)

Publish thought leadership, updates, and images to LinkedIn from SMC, then **measure** how they perform.

Metric	What it tells you
Impressions	How many times your post was seen
Members reached	Unique professionals who saw it
Reactions	Likes and similar engagement
Comments	Conversation on your post
Reshares	How often others shared your content

Where to view: Dashboard → LinkedIn performance panel, or **Posts** → view stats on individual posts.

Requirement: LinkedIn must approve analytics access for your organization's app. Until then, publishing works; detailed stats may be limited.

5B. LinkedIn Ads (paid campaigns)

Same experience as Google Ads — connect your **LinkedIn Ads account** and monitor:

- Impressions, clicks, cost, conversions, CTR
- Account totals and campaign-level breakdown
- Charts for the last 7, 30, or 90 days

How to connect:

- 1. Open **LinkedIn Ads** in the sidebar
- 2. **Connect LinkedIn Ads** → approve access
- 3. **Sync now**

Control from SMC: View and sync only. Campaign management stays in [LinkedIn Campaign Manager](#).

6. Facebook & Instagram (Meta)

Available today

Feature	Facebook Pages	Instagram Business
Connect account	✓	✓
Publish posts & images	✓	✓
Analytics in SMC	→ Coming soon	→ Coming soon
Meta (Facebook/Instagram) Ads reporting	→ Planned	→ Planned

SMC already helps you **publish** to Facebook and Instagram. **Performance analytics** for Meta platforms are on the product roadmap and will follow the same secure, read-only model as Google and LinkedIn Ads.

Planned metrics (organic): reach, impressions, engagement, likes, comments, shares, saves.

Planned metrics (paid ads): impressions, clicks, spend, CTR, conversions by campaign.

7. Side-by-Side Comparison

Platform	Type	In SMC today	You can view	You can manage from SMC
Google Ads	Paid advertising	✓ Live	Full campaign metrics	Connect & report only
LinkedIn Ads	Paid advertising	✓ Live	Full campaign metrics	Connect & report only
LinkedIn	Organic posts	✓ Publish + ⚠ Analytics	Post engagement	Publish + view stats
Facebook	Organic posts	✓ Publish	— (analytics soon)	Publish only
Instagram	Organic posts	✓ Publish	— (analytics soon)	Publish only
Meta Ads	Paid advertising	→ Planned	—	Planned: report only

8. Plans & Access

Plan	Analytics & ads reporting
------	---------------------------

Free	Content publishing; no ads analytics
Medium	Full dashboard analytics + Google Ads + LinkedIn Ads
Premium	Full analytics suite (same as Medium)

Upgrade to Medium or Premium to unlock the analytics panels and dedicated Google / LinkedIn Ads pages.

9. Security & Data Privacy

Your trust matters. SMC is built with enterprise-grade practices:

- **Official platform login** — You authorize SMC through Google, LinkedIn, or Meta; passwords are never stored
- **Encrypted credentials** — Connection tokens are encrypted at rest
- **Minimum access** — SMC requests only the permissions needed for publishing and reporting
- **You stay in control** — Disconnect any platform account at any time from SMC
- **Read-only ads data** — SMC reports on performance; it does not modify your live campaigns

Platform partners (Google, LinkedIn, Meta) may require their own app review for production analytics access. Your SMC administrator handles this once; end users simply connect their accounts.

10. Getting Started Checklist

For marketing users

- ☐ Log in to SMC (Medium or Premium for analytics)
- ☐ Connect social accounts on the **Accounts** page
- ☐ Connect **Google Ads** and/or **LinkedIn Ads** from the sidebar
- ☐ Click **Sync now** after connecting
- ☐ Review the **Dashboard** daily or weekly
- ☐ Use **Posts** to check organic LinkedIn performance

For administrators (one-time setup)

- ☐ Complete Google Ads API / developer approval (for live ad accounts)
- ☐ Register LinkedIn app products (Ads + Community Management for organic stats)
- ☐ Configure Meta app for Facebook/Instagram publishing
- ☐ Deploy SMC with secure hosting and HTTPS

Technical setup guides are available separately for your IT team.

11. Roadmap Highlights

Coming next	Benefit
Facebook & Instagram organic insights	See Page and IG post performance in SMC
Meta Ads reporting	Facebook & Instagram ad metrics alongside Google & LinkedIn
Automated sync schedules	Fresh data without manual "Sync now"

Export & PDF reports	Share performance with stakeholders
----------------------	-------------------------------------

12. Summary

SMC brings your marketing data together — publish once, measure everywhere (where supported). Google Ads and LinkedIn Ads reporting are **live today**. LinkedIn organic analytics and Meta insights are **rolling out** on the same secure, read-only foundation.

One login. One dashboard. Clear decisions.

Document reflects SMC capabilities as of July 2026. Platform features and approvals may vary by region and account type. For the latest product status, contact your SMC administrator.
